*Universal Awakening is Life seeking to know Itself and to realize Its fulfillment through conscious relationship.*

This weekend gathering for Universal Awakening is a celebration of the individual, of community, and of life at large. It is an event to catalyze and support an orientation toward new possibilities. The tools for awakening presented in this workshop are for everybody because awakening is available regardless of one's religion or way of exploring truth. These tools are designed to help participants more consciously relate to and support Life's awakening process, therein experiencing deep joy and fulfillment.

**Himayat Inayati Th.D.**, is an international spokesperson for Universal Awakening, a global initiative to awaken humanity to the sacredness within all of life. His work, which offers a truly universal perspective of the sacred, is rooted in the teachings of the great world spiritual traditions and is informed by current research in science. Himayat is a catalyst for the transformational process in others. He has presented training on mysticism and spiritual healing in fourteen countries around the world. And over the past 30 years, he has fostered an ongoing dialogue between spirituality and science centered on healing and transformational consciousness through numerous symposiums, conferences, and workshops. Himayat served as the international head of The Sufi Healing Order for twenty years.
